

ADVISORY SERVICES

Coreco partners with property owners and developers to tackle significant challenges and capitalize on key opportunities. We focus on creating sustainable outcomes and value through profitable project development, increased operating net income, and enhanced management results.

Implementation strategies for complex construction projects

Coreco delivers strategic insights for on-time, sustainable projects with enhanced net operating income. We streamline cost, minimize environmental impact, and tailor solutions to customer needs, navigating procurement, contractor selection, and risk management. With our deep market knowledge, we position your investments for maximum returns, focusing on value creation and profitable execution.

Enhanced client competence

Facing challenges with complex projects or unmet plans? Enhance your client role and project quality with our consultancy. We transform you into an efficient client organization, ensuring excellent and predictable results across projects, improving net operating income and management outcomes. Our consultants analyze your unique situation, ensuring you possess the necessary skills and organizational structure for success. Together, we develop sustainable competence for your team.

Sustainable supplier networks

Struggling to build an efficient, value-creating supplier network or reassess your current suppliers? Coreco specializes in enhancing supplier collaboration, procurement, and category strategy, rooted in construction and real estate expertise. We guide you from strategy through implementation, leading change efforts and managing procurement practically and strategically. Our methodology emphasizes sustainability, addressing both climate and social considerations.

Timeline: The project duration is typically three months.

Process: Situation analysis - Potential assessment - Strategy - Action plan

Cost: Fixed price or hourly rate of 1,400 – 2,500 SEK depending on the nature of the work.
